

V3locity ClaimsCenter

ClaimsCenter increases the efficiency and effectiveness of group disability claims operations either as a stand-alone solution or straight-through to V3locity CoreAdmin.

BENEFITS

Speed and Agility

ClaimsCenter greatly reduces turnaround times for disability claims processing. Use advanced analytics and configurable technology to adapt quickly and optimize outcomes for different claims scenarios.

Customer Experience

ClaimsCenter's digital engagement, and 360-degree customer service capabilities combine to help you deliver an outstanding customer experience. Provide advice and guidance to your customers when they need it, serve them quickly and conveniently, and drive better health outcomes for employees.

Data Accuracy

ClaimsCenter provides a single source of the truth for more efficient and effective disability claims processing and real-time status updates.

BUSINESS CHALLENGE

In a growing but intensely competitive market, claims service drives employer and employee satisfaction with group disability products. The efficiency and effectiveness of claims operations also significantly drives the profitability of these products. But overly manual claims processes and phone and paper-dominated customer engagement approaches too often result in poor claims outcomes. Disability insurance companies need to simplify, automate, and continuously optimize their claims processes to remain competitive. They need accurate, real-time claims data and analytics to underpin excellence in their disability claims operations and contemporary, omni-channel engagement alternatives to meet and exceed customers' servicing demands.

V3LOCITY CLAIMSCENTER

V3locity ClaimsCenter, a complete, customer-centric claims solution, streamlines your disability claims operations, helps you gain the analytical insights necessary to optimize claims outcomes, and transforms how you engage with employee and employer claimants. ClaimsCenter provides absence/leave management capabilities for the full range of leave options – short- and long-term disability, FLMA, state-specific, and company-specific. ClaimsCenter leverages the uniquely robust enterprise features of V3locity - CRM, workflow management, document and content management, reporting, and analytics.

We offer ClaimsCenter either as a stand-alone claims solution or as part of a complete, straight-through solution seamlessly integrated with Vitech's market-leading CoreAdmin suite, DocCenter and Digital applications. ClaimsCenter offers robust claims functionality out-of-the-box along with high configurability to adapt and optimize claims processes.

The AWS-powered data lake provides next generation, real-time analytics to monitor service levels, detect process bottlenecks, continuously score claims, and recommend the necessary actions to optimize claims outcomes. Integration with V3locity CoreAdmin can further optimize data exchange and accelerate overall automation efforts.
