Accelerate Your Digital Transformation

Who We Are

Vitech is a global provider of cloud-native benefit and investment administration software. We believe technology is best used to simplify complex business processes, and our mission is to bring better software solutions to market to address the complexities of the insurance, retirement and investment industries.

What We Do

At Vitech, we help our group insurance, retirement, and investment clients accelerate their digital transformation journeys. We are committed to innovation and continuously build better user experiences for our customers by pairing our deep domain expertise with the latest advancements in technology.

Your Trusted Partner

With unparalleled experience, Vitech is your trusted partner in your business transformation and ongoing operations. Our team of 1,600 professionals brings to bear insights, best practice and winning approaches gained in successful mission critical projects for over 100 client organizations.

We pair our proven delivery capabilities with an established partnership approach through our diverse partner ecosystem of the world's leading systems integrators and technology consultants. Vitech leverages these partnerships to ensure successful outcomes for our clients.

Your success is our success and we are dedicated to helping you craft and achieve your target state visions.

Our Solutions

V3locity® is Vitech's cloud-native administration, engagement, and analytics platform. It is a suite of complementary applications that provides an effortless digital customer experience, streamlines operations, and accelerates speed to market. V3locity offers full life cycle core business functionality and robust enterprise capabilities. Its micro-service architecture leverages the unique capabilities of AWS for unparalleled security, scalability, and resiliency.

We continuously improve our solutions with the latest advancements in technology through our significant annual investment in research and development.

Insurance Administration

V3locity is a powerful administration solution that offers group, voluntary, worksite, and individual insurance capabilities in a single, integrated, cloud-native platform. V3locity's extensive core functions, advanced digital features, and fluid configurability make it a comprehensive solution for all of your insurance administration needs.

Pension Risk Transfer (PRT) & Annuity Administration

V3locity offers PRT and group annuity administration capabilities for deals of all sizes. V3locity is highly configurable and can support a wide array of product designs, pension plan rules, and features. V3locity also provides the data "scrubbing" and bulk annuitant loading tools to set up new deals more quickly and accurately to meet plan sponsors' needs.

Retirement Administration

V3locity is a highly configurable retirement solution that offers defined benefit, defined contribution, cash balance, and hybrid plan administration capabilities in a single system. It supports health and other benefits enrollment, premium collection, and eligibility reporting for active and/or retirement participants. V3locity marries core administration with a revolutionary digital experience. Its modular design enables flexible, agile deployment strategies.

Investment Administration

V3locity is a robust investment administration solution that offers fund managers, institutional investors, fund administrators, and advisors alternative investment capabilities to deliver more accurate information and comply with reporting and regulatory obligations. V3locity also streamlines and automates deal flow, CRM, fund accounting, investor reporting, investment monitoring, and performance reporting.

We look forward to working with you on your digital transformation journey. To learn more about Vitech's innovative solutions, please visit **vitechinc.com.**
