V3locity DataInsight

V3locity DataInsight

Empower actionable insights.

A major challenge for today's businesses is harnessing the vast amount of data readily available to them. Isolated data islands, the lack of a unified data lake to manage data sources, the inability to access just-in-time insight, and difficulty in triggering on-demand actions leaves companies adrift in a sea of valuable intelligence, without the tools needed to fully utilize this information.

Critical data that can significantly impact a company's bottom line must be collected, transformed, and delivered to users for informed decision-making or offered as analytical services to enable processing, personalization, or recommendation. Business intelligence applied to this important consumer data can improve operations, maximize revenue opportunities, and deliver best-in-class customer service.

Powerful, Unified Intelligence

DataInsight powers Vitech's cloud-native data and analytics platform, leveraging AWS' big data analytics and machine learning technologies. Integrated with intelligence from V3locity's robust suite of applications and other third-party data analytics providers, DataInsight enables Vitech to rapidly build and deploy powerful analytics to drive critical business insights.

A united platform of robust technologies, DataInsight empowers Vitech to deploy new analytics solutions rapidly, facilitates customization for specialized applications, and can transform businesses to create significant top and bottom line advantages over their competition, in the markets they serve.

Empowered

DataInsight provides enhanced business intelligence by augmenting available datasets with additional enterprise and third-party data sources. Using enriched datasets, businesses are empowered to make better data-driven decisions such as identifying new business opportunities, operational enhancements, and customer relationship improvements.

Next-Level Analytics

Predictive analytics and modelling will allow organizations to discover business trends, previously hard to detect with traditional methods, and automate manual and repetitive tasks.
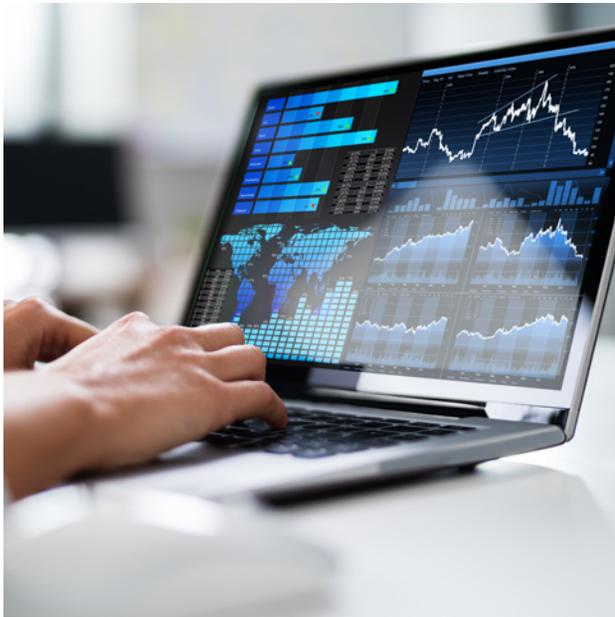

Analyzed as is or augmented with third-party data, the newly enhanced data will enable customers to make better data-driven decisions such as identifying new business opportunities, operational enhancements, and customer relationship improvements.

DataInsight enables the next level of analytical services for today's businesses. With dynamic, actionable insights, improved operational efficiencies, and just-in-time decisioning, DataInsight maximizes data usage for a powerful business advantage.
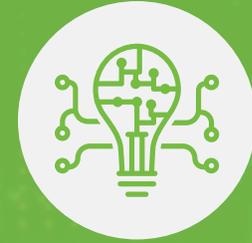

Accelerated

DataInsight accelerates time to insight by enabling holistic views of business operations and trends in near real-time. This means organizations can make better decisions, identify risks faster, and automate low-value tasks streamlining business processes.

Vitech's DataInsight Overview

Data Services	Data Management & Transformation	Data Services
